

## EC DECLARATION OF CONFORMITY

Name of Authorized Representative: Parker Hannifin Corporation  
Electromechanical & Drives, NA

Address of Authorized Representative: 5500 Business Park Drive  
Rohnert Park, CA 94928 USA  
tel (800) 358-9068 fax (707) 584-8015

Equipment: PS series gearheads with MU mounting kits  
RS series gearheads with MU mounting kits  
PX series gearheads with MU mounting kits  
RX series gearheads with MU mounting kits  
PV series gearheads with MV mounting kits  
RB/RD/RT series gearheads with MT and MU mounting kits

Description of Equipment: Gearheads  
See the User Guide for a full description of function

Year in which CE mark affixed: Not required

Gearheads comply with RoHS 2011/65/EU – Restriction of Hazardous Substances Directive

Gearboxes are not machines or incomplete machines in the sense of the EU Directive 2006/42/EC. Gearboxes are components intended for installation in machines and systems. A declaration of conformity in the sense of this Directive is not therefore permitted for gearboxes. The gearbox must not be commissioned within the area of application of Directive 2006/42/EC until it has been ascertained that the equipment in which the gearbox is being installed as a component complies with Directive 2006/42/EC.

The gearboxes are only intended to be installed in a machine and/or system or to be combined with other devices to form a machine and/or system.

The gearbox is used to convert torque and speed in industrial applications.

Observe the information relating to mounting and operation. The gearbox may only be operated within its technical specification. If the permissible technical data is exceeded, permanent or sudden gearbox damage may result.

The machine manufacturer must undertake a risk assessment for the machine to ensure that appropriate measures are taken to ensure that the gearbox is used as intended and that unforeseen movements cannot cause injury to people or damage to property. Additional requirements of the technical staff may result from the risk assessment.

The gearbox may only be commissioned once the machine and/or system in which the gearbox is fitted as a component conforms to the requirements of the applicable directives and statutory regulations
