

# 2970831

## D Series Master Controls

The D Series Master Control provides positive fuel shutoff (complete shutdown) with manual override at the control to allow the operator to manually override the valve each time the engine is started.

### Specifications:

- Primary oil setting: 5 to 25 PSI (as required and specified)
- Standard fuel flow coefficient (CV): approx. 2.85 GPM (10.7 LPM) diesel powered units
- Fuel inlet/outlet port: 3/8" NPT

Part Number	Engine Make	Override Feature	Spring Force (lbs)
D-5 <sup>1</sup>	Detroit Diesel	Yes	5
D-5V <sup>1</sup>	Detroit Diesel	No	5
D-5Y	Cummins Big Cam	Yes	8
D-10	All	Yes	10
D-10V	All	No	10
D-15	All	Yes	15
D-15V	All	No	15
D-20	All	Yes	20
D-20V	All	No	20

D-25	All	Yes	25
------	-----	-----	----

<sup>1</sup> Includes #41737 check valve (1/4" ) for fuel return line.

Master Control Mounting Bracket: Order Part Number MB-1.
