

High Temperature Cleaning – now with even higher working pressures

Parker Polyflex has extended the existing product range for high temperature cleaning. By introducing high temperature hose types with a Polyoxymethylene (POM) inner core, the available working pressure was raised to max. 2,200 bar (31,900 psi) for use with up to 100° C (212° F). This complements the HT Hose Family with PA inner core and working pressures up to 1,250 bar (18,125 psi).

Product highlights:

- Efficiency is improved, due to high temperature water being used, resulting in better and faster cleaning results
- Available in sizes -02 (DN 3), -025 (DN 4), -03 (DN 5), -04 (DN 6) and -05 (DN 8)
- 12 new hose types ranging in working pressure from 1,000 bar (14,500 psi) to 2,200 bar (31,900 psi)
- Existing standard fitting series can be used

Technical Information:

Part Number #	DN	Nominal I.D.		Maximum O.D.		Max. Working Pressure		Min. Burst Pressure		Min. Bend Radius		Weight		Fitting Series
