

FUEL/WATER SEPARATOR SPIN-ONS WITH OPEN END FOR BOWL

PROTECT YOUR ENGINE FROM WATER DAMAGE

In a modern fuel system, water can cause just as much damage as dirt. It leads to rust and corrosion which not only harms the tank, but also is passed along in the fuel stream in the form of hard particulate which causes engine wear. Combined with heat and pressure, water can damage parts through cavitation, erosion, etching and spalling.

Baldwin Fuel/Water Separators can help prevent damage by efficiently removing water from fuel before it reaches your engine.
