

SensoControl® ServiceJunior™

Digital Pressure Gauge

Accurate Pressure Measurement with Easy Operation:

Parker's ServiceJunior captures momentary pressure changes that are not seen by liquid-filled gauges. With a scan rate of 10 ms and accuracy of +/- 0.5%, it provides a true reflection of system pressure.

Simple operation with Min/Max and Hold functions, and easy-to-read backlit bar graph display. Conveniently measures psi, bar, mPa, and kPa with one gauge.

Color coded covers correspond with gauge pressure ranges for quick visual identification.

Compatible with most hydraulic and pneumatic media, and suitable for use with mobile and industrial systems.
