

Characteristics

The proportional solenoid operated pilot stage with integrated electronics controls a seated type main stage. The valves are optionally available with a mechanical maximum pressure adjustment.

The onboard electronics of the proportional pressure relief valves is based on the functionality of the digital amplifier PCD00.

The digital onboard electronics is situated in a robust metal housing and can be used in rough environments.

The nominal values of the valves are factory set. Additionally the ProPxD software permits the editing of all parameters. The software is also used for the digital electronic modules. The cable for connection to a serial RS232C interface is available as accessory.

The electrical connection is available in 2 options:

- Code 10V: 6 + PE central connection
 0...+10 V command signal
 +10 V reference voltage output
- Code 4MA: 6 + PE central connection
 4...20 mA command signal

Features

- Pilot operated with proportional solenoid
- Onboard electronics factory set
- Ramp time adjustment
- Linearized characteristics
- 3 pressure stages
- 2 interfaces:
 - R4V subplate ISO 6264 (DIN 24340 Form D)
 - R6V subplate ISO 6264 (DIN 24340 Form E)
- Optional mechanical maximum pressure adjustment

Central connection		6 + PE acc. EN 175201-804	
Cable specification	[mm ²]	7 x 1.0 overall braid shield	
Cable length max.	[m]	50	

¹⁾ If valves with onboard electronics are used in safety-related parts of control systems, in case the safety function is requested, the valve electronics voltage supply is to be switched off by a suitable switching element with sufficient reliability.

ProPxD interface program

The ProPxD software permits comfortable parameter setting for the module electronics. Via the clearly arranged entry mask the parameters can be noticed and modified. Storage of complete parameter sets is possible as well as printout or record as a text file for further documentation. Stored parameter sets may be loaded anytime and transmitted to other valves. Inside the electronics a non-volatile memory stores the data with the option for recal-ling or modification.

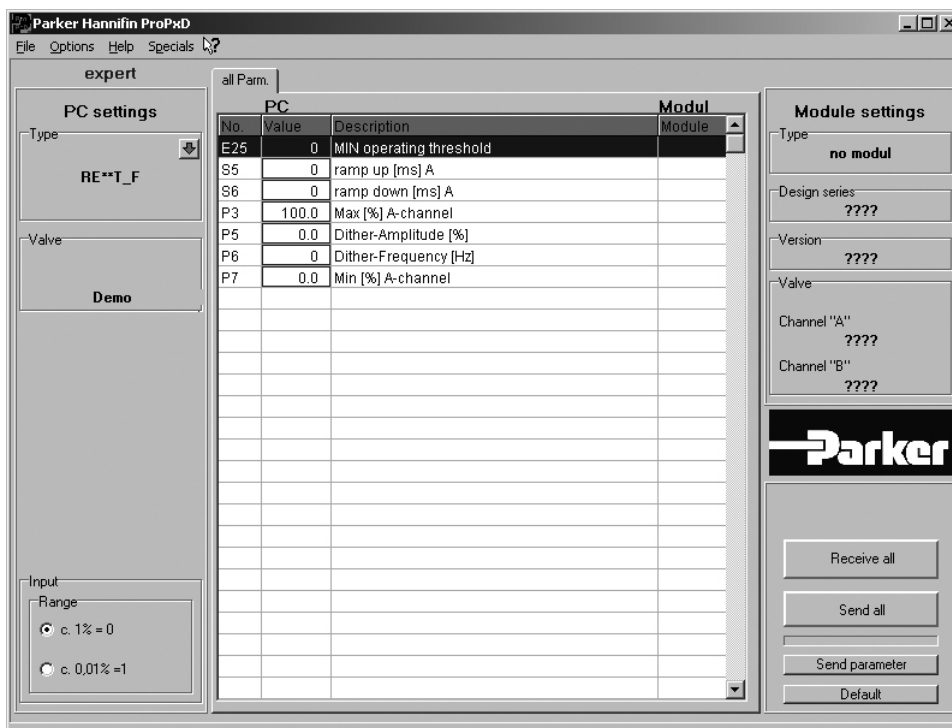

The PC software can be downloaded free of charge at www.parker.com/isde – see page “Support“ or directly at www.parker.com/propxd.

Features

- Comfortable editing of all parameters
- Depiction and documentation of parameter sets
- Storage and loading of optimized parameter adjust-ments
- Executable with all actual Windows® operating systems from Windows® XP upwards
- Plain communication between PC and electronics via serial interface RS232C

The parametrizing cable may be ordered under item no. 40982923.
