### CRANKCASE BREATHER

The Baldwin Filters' CV15010 Crankcase Breather meets ever-increasing emission regulations, while removing harmful oil mist and particulates that would otherwise be released into the air.

The CV15010 features proprietary PEACH® Media Technology, which allows high flow and maximum efficiency. The PEACH Coalescing Element utilizes patented synthetic media layers bonded together to provide outstanding filtration protection. Inner, exposed layers of the media capture larger contaminants, while the deeper layers filter down to the 0.2 micron level.

Ultrasonic welding bonds plastic components together to ensure structural durability to withstand tough operating conditions.
