

BALDWIN PRODUCT PICK

PA10095

PANEL AIR ELEMENT WITH FOAM PAD

Dirt enters your engine through the air intake, making the PA10095 Panel Air Element with Foam Pad the first line of defense in protecting your Chevrolet and GMC 6.6L turbo diesel pickup engines.

The combination of a foam pad and cellulose media removes contaminants to keep your hardworking turbo diesel pickup moving. Baldwin offers full coverage for these popular vehicles when you add the PA10095, PF46126 Fuel Element and B1441 Lube Spin-on to your maintenance schedule.
