## BF46068

### FUEL SPIN-ON WITH OPEN PORT

Baldwin's BF46068 Fuel Spin-on with Open Port is designed to protect a variety of Case and New Holland equipment, including loaders, telehandlers and trenchers.

The BF46068 features anodized aluminum threads, which are stronger and more dimensionally stable than plastic threads that can shrink or swell with humidity changes, heat and other environmental factors. The BF46068 fuel spin-on with open port is compatible with OE bases, bowls and filter drains/sensors.
