

BALDWIN PRODUCT PICK

CA30202

CHANNEL FLOW EXO PRIMARY AIR ELEMENT WITH HANDLES

Baldwin's CA30202 Channel Flow EXO air filter for gen sets, and industrial and marine engines take the straight-through airflow path of Channel Flow and combine it with cutting edge, proprietary technology. Baldwin's highly durable, patented outer coating provides rugged protection and prevents structural failure.

Once these filters are ready to be changed, they are heavy and removing them can be a challenge. Baldwin's robust dual handles on either side of the filter allow for easier handling when the filter is fully loaded.

The PA30200, the secondary filter for the CA30202, is sold separately. The PA30200 is only compatible with Baldwin Channel Flow EXO filters. Channel Flow EXO filters are not compatible with the OE secondary filter.

SPECIFICATIONS		APPLICATIONS	
CA30202	O.D.:	21 5/8 (549.7)	 
	Length:	8 3/32 (205.5)	
	Use With:	PA30200	
PA30200	O.D.:	19 3/8 (492.5)	Caterpillar Generators, Gen Sets, Industrial Engines, Marine Engines
	Length:	1 19/32 (40.1)	
	A. Gskt.:	[1] Included	
	Use With:	CA30201, CA30202
