

RS30223 & RS30224

Radial Seal Outer & Inner Air Elements

Keep your Case and New Holland motor grader engines running with protection from Baldwin's new RS30223 & RS30224 Radial Seal air filters. These filters are designed with a special urethane compound that withstands extreme temperatures or temperature fluctuations and will not degrade over time. Changes to air restriction and vibration during engine run time do not affect the excellent sealing surface provided. The filtration media removes 99.9% of all airborne contaminants. It also features great dirt holding capacity to keep your equipment productive until its next scheduled maintenance.
