

RS30257

Radial Seal Outer Air Element

NEW RELEASE

The RS30257 Radial Seal Outer air element is one of Baldwin's most recent additions to the Radial Seal family of air filter products. The metal wrapper protects the media and provides structural strength. With 73 percent of the surface area of the metal wrapper open, minimal air flow restriction is attained.

The heavy-duty radial seal gasket formed from this urethane compound is designed to make servicing easier and more cost effective. Keep your engine protected from today's potential harsh air environments with confidence, knowing world-class filtration products are on your side.
