RS30065 and RS30065 KIT

Baldwin Filters recently introduced the RS30065 Radial Seal Air Element and the RS30065 KIT.

The RS30065 and RS30065 KIT are replacements for the RS5362. The RS5362 is a Radial Seal Air Element with the lid attached. The RS30065 KIT contains both the air element and a reusable lid. The lid is not attached.

When replacing the OE Element, which has the lid attached, the RS30065 KIT should be used for the initial installation. For future services, simply replace the RS30065 element.

The RS30065 element is not compatible with the OE or other aftermarket lids. The RS30065 must be used with the lid that is supplied in the RS30065 KIT. This lid is made of impact resistant material suited for repeated use with the RS30065 on respective recommended applications.

The RS30065 has been thoroughly tested to verify that we are providing our customers with a premium aftermarket replacement to the original equipment filter.
